## Summer Classics

Summer Classics offers six unique products for outdoor use. Weatherproofed Wicker, Loomed Wicker, Wrought Aluminum, Cast Aluminum, Wrought Iron, and Teak.

The wicker items offer the appearance of traditional wicker with construction that lasts a lifetime. UV resistant extruded resins are hand woven over an aluminum frame to create a durable product. This extruded wicker never cracks or rots and is finished just like real wood.

Summer Classics has over 60 outdoor fabrics for cushions and pillows. Cushions are made with a quick drying Dacron fiber fill. All of the fabrics offered are made of 100% acrylic, which is UV, weather, chlorine, mold, perspiration and salt water resistant.

April is the right time to start thinking about outdoor decor. Summer Classics has an 8-10 week lead time, so order early.

Amber (20% Upcharge)

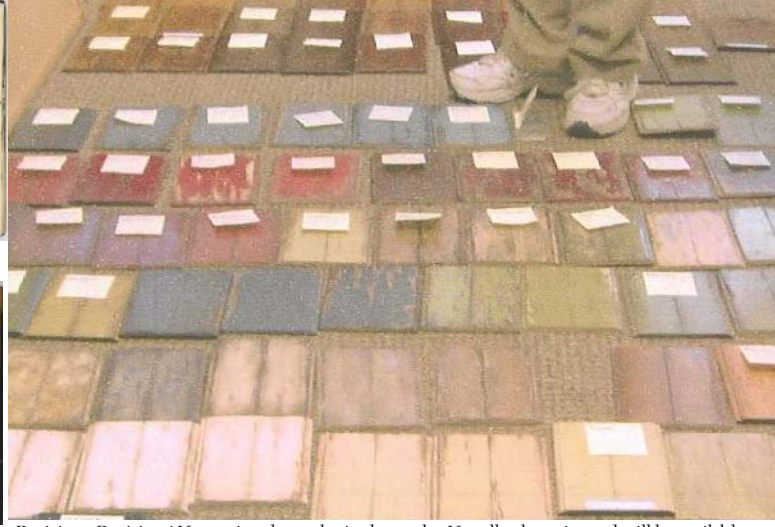

Chiffon (20% Upcharge)

Fig (20% Upcharge)

Boxcar (20% Upcharge)

Decisions, Decisions! New painted samples in the works. Not all colors pictured will be available.

Bausman & Co. has been hard at work dreaming up 30 new premium finishes and over 60 special order finishes. Four of the special order finish samples have arrived here at Designers Only, with the rest to be unveiled with the new catalog, which will be released in May. This will bring the number of finishes available from Bausman to a whopping 120 selections!

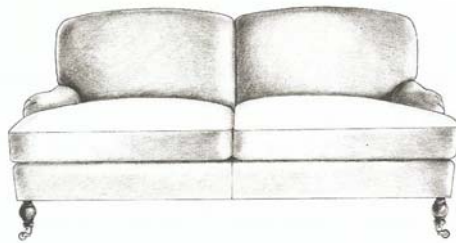

Pardon Our Dust.....

## Classic Furniture Collection Designer Event

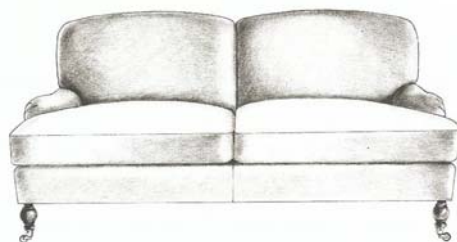

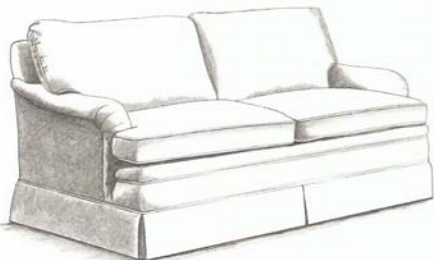

March 15th  
through June 1st, 2006

A 15% discount will apply to any B&F fabric, leather or trim used on any item in the Classic Collection purchased during this event.

Any Classic Collection item that is purchased during the Designer Event will include a 6 week production time.

# Know Your Natural Fibers

Texture, durability, and easy care have made natural fibers a favorite. Use this guide to help you choose the correct natural fiber furniture to suit your design needs.

**Seagrass-** This natural fiber is strong and easy to maintain. When it is woven onto wood frames it becomes almost as strong as upholstered furniture.

**Caning-** A centuries old construction technique in which bamboo or rattan is tightly woven to create a durable, breathable surface. Caning is most often used on chair seats.

**Rattan-** The tropical rattan palm is a vine that can grow up to 600 feet in length. Rattan can withstand a wide range of moisture so it is an ideal choice for covered porches or patios.

**Jute-** A strong renewable fiber grown from the plant of the same name. Jute is very soft and twice as durable as cotton. It is a great choice for rugs in high traffic areas.

**Bamboo-** Often referred to as wood, it is actually a strong, hollow stem grass. Bamboo's natural look puts a tropical feel in a room. It can also be made into flooring.

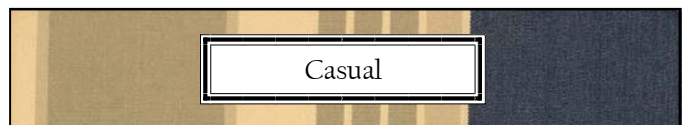

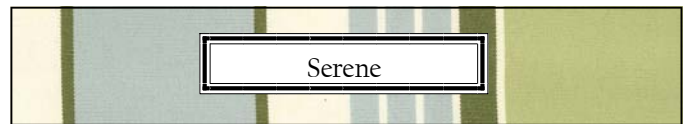

**Sisal-** Natural sisal has a relaxed feel that makes it right at home in casual living spaces. It is derived from the agave cactus plant and it is perfect for areas that need durability.

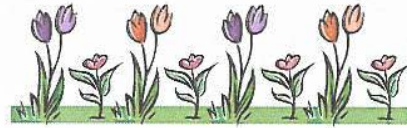

## New Brunswick & Fils Outdoor Living Fabrics !

100% Acrylic has outstanding light and mildew resistance. It also resists chlorine, perspiration and salt water. Easy to care for by machine washing with warm water and a mild liquid soap. Brunswick's new fabric collection has an improved hand from the 2005 collection. It is soft and doesn't feel stiff like the outdoor fabrics of the old days. Many colorways and style sare available to complement any décor.
